

CONTENTS

Review Analysis

Securing Smart Healthcare: Intrusion Detection in IoMT Networks Using Deep Learning	01-10
PSOX: Leveraging Historical and Global Optima to Enhance Diversity and Speed in Genetic Algorithm Crossover	11-20
Research on Enterprise Management Data Analysis Based on Artificial Intelligence	21-32
Research Progress in AI-assisted Characteristic Pattern Analysis and Quality Evaluation Methods for Authentic Medicinal Materials	33-43
Research on Federated Transfer Learning Algorithms for Real-Time Analysis of Students' Learning Situation and Personalized Paths under Edge Computing Architecture	44-57
Research on Planar Path Planning of Mobile Robot Based on Cellular Automata	58-66

Application Demonstration

Practical Path to Empower the Intelligence of Moral and Legal Education Resources	67-73
Exploration and Practice in the Construction and Dissemination of a Smart Urban Governance System: A Case Study of Baiyun District	74-82
Research on Community Logistics Distribution Optimization Based on BDS Technology and Intelligent Algorithms	83-92
Exploring Attribution Biases in Responsibility Assignment during Digital Human Live Streaming: An Experimental Analysis	93-103
A Case of 3D Virtual Laboratory Design Implementation and Intelligence for Mechatronics Courses	104-120

Frontier Prospects

Pathways for Breaking Through the Dilemmas of Vocational Education in China from the Perspective of Artificial Intelligence Empowerment	121-128
---	---------

Multidimensional Consumer Segmentation in AI Digital Human Image Adaptation: An Empirical Study of Age, Cultural Preferences, and Consumption Motivations 129-140

Beyond Fair Use and Opt-Out: Forging a Hybrid Copyright Path for Generative AI in China 141-146

A Quantitative Study on the Influencing Factors of AI-Powered Elderly E-commerce Consumption 147-155
